

How to draw the gems 2.

Draw the outline and shading with pen.

If the light is on the top left , make sure to leave the gems on the bottom right , white.

Add color with colored pencils.

You can choose whether to leave the bottom right white or to color it.

Using a pen or Black colored pencil I make the shading darker.

Using adding white on the topleft area , add white on the brightest part.

When adding white on the brightest part , you can add either two dots , two lines , or one of each.
